

Skyler is a seasoned designer whose decade of experience has resulted in a unique blend of careful study, keen intuition, and meticulous process. After several years simultaneously working as a UX and UI designer, as well as providing creative direction and management for organizations, he has recently re-focused exclusively on UX and UI in order to get back to what he loves: the creation and refinement of interactive products.

Skyler spent several years as Chief Creative Officer & Lead UI/UX Designer at Transpose, Inc in Seattle. While there, **his designs helped thousands of large and small businesses transform intimidating data management tasks in to effortless insight.** Additionally, he fostered a lightweight creative team that could meet the needs of a dynamic workplace.

At Amazon, Skyler worked as a Senior Designer, where **he brought the polish of a B2C design process to enterprise-focused products.**

Previously at Golden Frog, Skyler was hired as a Sr. UI/UX designer, and later promoted to Lead UI/UX designer and Creative Director. **His process and advocacy drove renewed investment in design on the part of Golden Frog as an entire organization.**

As an independent designer, Skyler has led the design of interactive products for a wide variety of clients, from exciting local products to globally recognized brands. **He brings with him a studied, evidence-based approach, rooted in an academic background that bridges the disciplines of Cognitive Psychology and Graphic Design.** (BA 2009 Cognitive Psych., BA 2009 Graphic Design – Lewis & Clark College, Portland, OR)
